

The Laws of Money

7 laws that decide if your money compounds or disappears.

1. Money loves speed, wealth loves time

Make a good decision, then let time compound it.

2. Whoever gives the money has the power

Buyers and builders win, not salary earners.

3. Leverage is a game of collateral

The number one growth engine right, ruin wrong.

4. Cash flow keeps you alive, equity frees you

Cash flow funds today; equity builds tomorrow.

5. Risk and reward are non-linear

Cap the downside, maximize the upside.

6. Don't bet the empire for a pot of gold

Size your bets. Never lose the game.

7. Diversification is a hedge against ignorance

Concentrate where you understand and control.
