

The 10-10 Relationship Map

Name your bets, choose your first move, and take the map with you.

Three people I'd invest in for 10 years

Classmates, alumni, that analyst who answered your DM. _____

My first value-give this week:

Make an intro

Promote their work

Show up to their thing

I'm playing with no scorecard

Give without tracking who owes whom.

I'm investing in 30+ so the real 10 emerge

You can't predict which bets pay. Volume finds them.

E.G. *Today's analyst is tomorrow's MD. The classmate next to you becomes the referral that gets you in.*

You cannot predict your ten. So invest in forty.

The right relationships reveal themselves over a decade.
